Our reputation is spreading

## WILLIAMS POND STIRRER

### Tractor Driven

This is a tractor PTO driven 3 point mounted effluent pond stirrer, used to stir the pond prior to emptying. It has a multi-directional agitator, not a propeller, which minimises bank scouring and tangling with any rubbish in the pond. It saves considerable time when loading and spreading and ensures even consistency when spreading effluent.

Pond Stirrer attached to tractor

- 5 metres long
- 600mm x 300mm multi-directional agitator (not a propeller) which eliminates scouring and tangling
- Totally sealed taper roller bearings
- Bearings run in oil
- 4 Heavy neoprene seals running on a stainless shaft
- Adjustable heavy duty ratchet top-link
- Road wheels that swing out of the way when stirring
- Heavy duty drive shaft
- Safety clutch available
- **NZ Designed and Manufactured**
- **Neat and tidy, simple to use**
- **Built to last**
- **Cost effective**

### Stirrer Pump

The Williams Stirrer Pump adds a new dimension to the spreading of effluent with a pressure loading system.

- Fits to any Williams Stirrer with 600mm multi-directional impeller
- Eliminates blockages
- Will fill any type of tank (vacuum or non-vacuum)
- Recirculates slurry
- Quickly unclips for pre-stirring
- Stirs while pumping
- Supplied with two 4 metre long 150mm hoses and a 150mm gate valve and fittings.
- Hot-dipped galvanised.
